DETAILED ACTION

Election/Restrictions

Claims were withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) filed March 3, 2004. The election of the species of thick and thin pads on the same surface has been acknowledged. Applicant's argument are persuasive with respect to distinguishing between wirebonds and solder ball connection, but are unpersuasive to the species of a thick and thin pads on the same surface compared to thick and thin pads on different surfaces. Because the species and burden have been established pursuant to M.P.E.P the restriction is deemed proper.

In contacting applicant to indicate the allowability of the elected species, the nonelected claims drawn to the plated through hole have been canceled as indicated below.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jack Friedman on July 22, 2004 to overcome newly discovered art that was indicated by examiner and cited in current PTO-892.

Allowable Subject Matter

Claims 2-5,9-13,33,34,37,38 and 41 allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious forming a first and second circuit line totally external to an interior of a substrate that are in physical surface to surface contact with each other with the first circuit line having a thickness different than the second circuit line, along with the first and second circuit lines having pad portions that have widths that exceed the remaining portions of the line, wherein a carrier is connected to one pad and an electronic assembly is connected to the other pad. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
